CONTENTS OF VOLUME 108

NUMBER 1, 25 NOVEMBER 1976

RUSSELL, G. J., WALKER, P. M. B., ELTON, R. A. and SUBAK-SHARPE, J. H., Doublet Frequency Analysis of Fractionated Vertebrate Nuclear DNA . 1

Appendix: ELTON, R. A., Experimental Errors in Doublet Frequencies . 21

WADA, C., HIRAGA, S. and YURA, T., A Mutant of *Escherichia coli* Incapable of Supporting Vegetative Replication of F-like Plasmids . . . 25

ZILBERSTEIN, A., DUDOCK, B., BERISSI, H. and REVEL, M., Control of Messenger RNA Translation by Minor Species of Leucyl-transfer RNA in Extracts from Interferon-treated L Cells 43

KUEBBING, D., DIAZ, A. T. and WERNER, R., Size Distribution of Short-chain Replication Intermediates in HeLa Cells 55

KRISCH, H. M. and VAN HOUWE, G., Stimulation of the Synthesis of Bacteriophage T4 Gene *32* Protein by Ultraviolet Light Irradiation . . . 67

LESCURE, B., OUDET, P., CHAMBON, P. and YANIV, M., Transcription of Polyoma Virus DNA *in vitro*. Localization of *Escherichia coli* RNA Polymerase Initiation Sites 83

PAWL, G., TAYLOR, R., MINTON, K. and FRIEDBERG, E. C., Enzymes involved in Thymine Dimer Excision in Bacteriophage T4-infected *Escherichia coli* . 99

MINKLEY, E. G., JR, POLEN, S., BRINTON, C. C., JR and IPPEN-IHLER, K., Identification of the Structural Gene for F-Pilin 111

SCHWENDIMANN, B., INGBAR, D. and BERNHARD, S. A., On the Function of Half-site Reactivity: Intersubunit NAD^+-dependent Activation of Acyl-Glyceraldehyde 3-Phosphate Dehydrogenase Reduction by NADH . . 123

WEGNER, A., Head to Tail Polymerization of Actin 139

COHEN, R. J. and BENEDEK, G. B., The Functional Relationship between Polymerization and Catalytic Activity of Beef Liver Glutamate Dehydrogenase. I. Theory 151

Appendix: Thermodynamics of Linear Polymer Formation . . . 176

COHEN, R. J., JEDZINIAK, J. A. and BENEDEK, G. B., The Functional Relationship between Polymerization and Catalytic Activity of Beef Liver Glutamate Dehydrogenase. II. Experiment 179

Appendix: Quasi-elastic Light-scattering Data Acquisition, Reduction and Error Analysis 197

Wool, I. G. and Stöffler, G., Determination of the Size of the Pool of Free Ribosomal Proteins in Rat Liver Cytoplasm 201

Thiery, J-P., Macaya, G. and Bernardi, G., An Analysis of Eukaryotic Genomes by Density Gradient Centrifugation 219

Macaya, G., Thiery, J-P. and Bernardi, G., An Approach to the Organization of Eukaryotic Genomes at a Macromolecular Level 237

Letters to the Editor

Al-Hilal, D., Baker, E., Carlisle, C. H., Gorinsky, B., Horsburgh, R. C., Lindley, P. F., Moss, D S., Schneider, H. and Stimpson, R., Crystallization and Preliminary X-ray Investigation of Rabbit Plasma Transferrin 255

Noll, M., Stöffler, G. and Highland, J. H., Dissociation of *Escherichia coli* Ribosomes into Active Subunits 259

Martin, P. D., Petsko, G. A. and Tsernoglou, D., New High pH Crystal Forms of Ribonucleases A and S 265

Number 2, 5 December 1976

Editorial Jeffries Wyman for his 75th birthday i

Lerman, L. S., Wilkerson, L. S., Venable, J. H., Jr and Robinson, B. H., DNA Packing in Single Crystals Inferred from Freeze–Fracture–Etch Replicas 271

Index to Volume 108

Acheta domesticus and *Dytiscus marginalis*, heterogeneity of spacer lengths in circles of amplified ribosomal DNA, 453
Actin, head to tail polymerization, 139
Activity, catalytic, and polymerization of beef liver glutamate dehydrogenase, their functional relationship: experiment, 179
—, —, — — — — — — — —, — — —: theory, 151
Acyl-glyceraldehyde 3-phosphate dehydrogenase reduction by NADH, intersubunit NAD^+-dependent activation; on the function of half-site reactivity, 123
Ahmad-Zadeh, C. (see also Greenblatt, J. F.), 361
Air, G. M., Sanger, F. & Coulson, A. R., Nucleotide and amino acid sequences of gene *G* of ϕX174, 519
Al-Hilal, D., Baker, E., Carlisle, C. H., Gorinsky, B., Horsburgh, R. C., Lindley, P. F., Moss, D. S., Schneider, H. & Stimpson, R., Crystallization and preliminary X-ray investigation of rabbit plasma transferrin, 255
Allet, B. (see also Greenblatt, J. F.), 361
Amino acid and nucleotide sequences of gene *G* of ϕX174, 519
Asakura, S. (see also Kamiya, R.), 513
Axelrod, N., Transcription of bacteriophage ϕX174 *in vitro*: analysis with restriction enzymes, 771
—, — — — — — —: selective initiation with oligonucleotides, 753

Bacillus subtilis, initiation of DNA replication; analysis of molecular events involved in the initiation using a temperature-sensitive *dna* mutant, 683
Bacterial plasmids, involvement of multiple translocating DNA segments and recombinational hotspots in their structural evolution, 333
Bacteriophage lambda control of escape synthesis of β-galactosidase, 733
— mRNA, units of functional stability, 651
— ϕX714 transcription *in vitro*: analysis with restriction enzymes, 771
— — — — —: selective initiation with oligonucleotides, 753
— PM2 DNA, mapping of recognition sites for the restriction endonuclease from *Escherichia coli* K12, 583
— T4 gene *32* protein, synthesis stimulated by ultraviolet light irradiation, 67
— —-infected *Escherichia coli*, enzymes involved in thymine dimer excision, 99
Baker, E. (see also Al-Hilal, D.), 255
Barritault, D. (see also Expert-Bezançon, A.), 781
Base-pair opening, computation of probability, 678
Beef liver glutamate dehydrogenase, functional relationship between polymerization and catalytic activity: experiment, 179
— — — —, — — — — — — — —: theory, 151
Belitsina, N. V., Glukhova, M. A. & Spirin, A. S., Stepwise elongation factor G-promoted elongation of polypeptides on the ribosome without GTP cleavage, 609
Benedek, G. B. (see also Cohen, R. J.), 151, 179
Berissi, H. (see also Zilberstein, A.), 43
Bernardi, G. (see also Macaya, G.), 237
— (see also Thiery, J-P.), 219
Bernhard, S. A. (see also Schwendimann, B.), 123
Bickle, T. A. (see also Brack, C.), 583
Bostock, C. J., Christie, S., Lauder, I. J., Hatch, F. T. & Mazrimas, J. A., S phase patterns of replication of different satellite DNAs in three species of *Dipodomys* (kangaroo rat), 417
Bourque, D. P. (see also Hubert, J. J.), 789
Bovine epidermal keratin filaments, self-assembly *in vitro*, 547
Brack, C., Eberle, H., Bickle, T. A. & Yuan, R., Mapping of recognition sites for the restriction endonuclease from *Escherichia coli* K12 on bacteriophage PM2 DNA, 583
Brevet, J. (see also Kopecko, D. J.), 333
Brinton, C. C., Jr (see also Minkley, E. G., Jr), 111

Capsid protein, major, and tumour antigen of Simian virus 40, synthesis in a cell-free system derived from *Escherichia coli*, 361
Carlisle, C. H. (see also Al-Hilal, D.), 255
Cashmore, A. R. (see also Gray, R. E.), 595
Catenated molecule formation by replication of colicin E1 plasmid DNA in cell extracts, 569
Cesium sulfate density gradients and isolation of messenger ribonucleoproteins: evidence that polyadenylated and non-polyadenylated mRNAs are associated with protein, 403
Chambon, P. (see also Lescure, B.), 83
Changchien, L-M. & Craven, G. R., The function of the N-terminal region of ribosomal protein S4, 381
Chloramphenicol, effects on the transcriptional activities of ribosomal RNA and ribosomal protein genes in *Escherichia coli*, 535
Christie, S. (see also Bostock, C. J.), 417
Chromosomal replication mode in *Escherichia coli* K12, effect of thymine concentration, 295
Cohen, R. J. & Benedek, G. B., The functional relationship between polymerization and catalytic activity of beef liver glutamate dehydrogenase. I. Theory, 151
—, Jedziniak, J. A. & Benedek, G. B., The functional relationship between polymerization and catalytic activity of beef liver glutamate dehydrogenase. II. Experiment, 179
Cohen, S. N. (see also Kopecko, D. J.), 333
Colicin E1 plasmid DNA replication in cell extracts, and formation of catenated molecules, 569
Collagen, molecular packing: three-dimensional analysis of electrostatic interactions, 705
Coulson, A. R. (see also Air, G. M.), 519
Craven, G. R. (see also Changchien, L-M.), 381
Crystal forms, high pH, new, of ribonucleases A and S, 265
—, single, DNA packing inferred from freeze–fracture–etch replicas, 271
Crystallization and preliminary X-ray investigation of rabbit plasma transferrin, 255
Crystallographic refinement of yeast phenylalanine tRNA at 2·5 Å resolution, 619
Cytoplasm, rat liver, determination of the size of the pool of free ribosomal proteins, 201

Dehydrogenase for acyl-glyceraldehyde 3-phosphate, intersubunit NAD^+-dependent activation of reduction by NADH; on the function of half-site reactivity, 123
— — beef liver glutamate, functional relationship between polymerization and catalytic activity: experiment, 179
— — — — —, — — — — — — — —: theory, 151
Dennis, P. P., Effects of chloramphenicol on the transcriptional activities of ribosomal RNA and ribosomal protein genes in *Escherichia coli*, 535
Density gradient centrifugation used in analysis of eukaryotic genomes, 219
DNA, colicin E1 plasmid, replication in cell extracts, and formation of catenated molecules, 569
— interaction with formaldehyde, theoretical and experimental study reveals fluctuational opening of the double helix, 665
—, nuclear, vertebrate, fractionated, doublet frequency analysis, 1
— of bacteriophage PM2, mapping of recognition sites for the restriction endonuclease from *Escherichia coli* K12, 583
— — polyoma virus, transcription *in vitro*; localization of *Escherichia coli* RNA polymerase initiation sites, 83
— packing in single crystals inferred from freeze–fracture–etch replicas, 271
— replication in HeLa cells, 55
— — — main band and satellite DNAs of *Drosophila virilis*, electron microscopic analysis, 305
— — initiation in *Bacillus subtilis*; analysis of molecular events involved in the initiation using a temperature-sensitive *dna* mutant, 683
—, ribosomal, amplified, heterogeneity of spacer lengths in circles for two insect species, *Dytiscus marginalis* and *Acheta domesticus*, 453
— segments, translocating, multiple, and recombinational hotspots, involvement in the structural evolution of bacterial plasmids, 333
DNAs, satellite, S phase patterns of replication in three species of *Dipodomys* (kangaroo rat), 417
dna mutant, temperature-sensitive, used in analysis of molecular events involved in the initiation of DNA replication in *Bacillus subtilis*, 683
Diaz, A. T. (see also Kuebbing, D.), 55
Dipodomys (kangaroo rat), S phase patterns of replication of different satellite DNAs in three species, 417
Dissociation of *Escherichia coli* ribosomes into active subunits, 259
Doublet frequency analysis: experimental errors, 21

Doublet frequency analysis of fractionated vertebrate nuclear DNA, 1
Drosophila virilis, electron microscopic analysis of DNA replication in main band and satellite DNAs, 305
DUDET, P. (see also LESCURE, B.), 83
DUDOCK, B. (see also ZILBERSTEIN, A.), 43
Dytiscus marginalis and *Acheta domesticus*, heterogeneity of spacer lengths in circles of amplified ribosomal DNA, 453

EBERLE, H. (see also BRACK, C.), 583
EDLUND, T., GUSTAFSSON, P. & WOLF-WATZ, H., Effect of thymine concentration on the mode of chromosomal replication in *Escherichia coli* K12, 295
Endonuclease, restriction, from *Escherichia coli* K12, mapping of recognition sites on bacteriophage PM2 DNA, 583
Enzymes involved in thymine dimer excision in bacteriophage T4-infected *Escherichia coli*, 99
Electron microscopic analysis of DNA replication in main band and satellite DNAs of *Drosophila virilis*, 305
— — studies, high resolution, of genetic regulation, 471
Electrostatic interactions, three-dimensional analysis: molecular packing of collagen, 705
Elongation factor G-promoted elongation, stepwise, of polypeptides on the ribosome without GTP cleavage, 609
ELTON, R. A., Experimental errors in doublet frequencies (*Appendix* to RUSSELL, G. J., *et al.*, 1), 21
— (see also RUSSELL, G. J.), 1
Escape synthesis of β-galactosidase under the control of bacteriophage lambda, 733
Escherichia coli, close proximity of 50 S subunit proteins L7/l12 and L10 and L11, 781
— —-derived cell-free system, and synthesis of the tumour antigen and the major capsid protein of Simian virus 40, 361
— —, effects of chloramphenicol on the transcriptional activities of ribosomal RNA and ribosomal protein genes, 535
— — K12, effect of thymine concentration on the mode of chromosomal replication, 295
— — — — restriction endonuclease, mapping of recognition sites on bacteriophage PM2 DNA, 583
— — mutant incapable of supporting vegetative replication of F-like plasmids, 25
— — RNA polymerase initiation site localization; transcription of polyoma virus DNA *in vitro*, 83
— — ribosomes, dissociation into active subunits, 259
Eukaryotic genomes, analysis by density gradient centrifugation, 219
— — organization at macromolecular level, 237
Excision of thymine dimers in bacteriophage T4-infected *Escherichia coli*, enzymes involved, 99
EXPERT-BEZANÇON, A., BARRITAULT, D., MILET, M. & HAYES, D. H., Close proximity of *Escherichia coli* 50 S subunit proteins L7/L12 and L10 and L11, 781

F-pilin, identification of the structural gene, 111
Filament of bovine epidermal keratin, self-assembly *in vitro*, 547
Flagellar transformations at alkaline pH, 513
F-like plasmid vegetative replication cannot be supported by a mutant of *Escherichia coli*, 25
Fluctuational opening of the double helix as revealed by theoretical and experimental study of DNA interaction with formaldehyde, 665
Formaldehyde, interaction with DNA, theoretical and experimental study reveals fluctuational opening of the double helix, 665
— reaction with nucleotides, rate constants, 680
FRANKE, W. W. (see also TRENDELENBURG, M. F.), 453

Mutant, *dna*, temperature-sensitive, used in analysis of molecular events involved in the initiation of DNA replication in *Bacillus subtilis*, 683
— of *Escherichia coli* incapable of supporting vegetative replication of F-like plasmids, 25
— of tobacco mosaic virus with non-functional coat protein and its revertant: relationship to the virus assembly process, 789

NADH reduction of acyl-glyceraldehyde 3-phosphate dehydrogenase, intersubunit NAD^+-dependent activation; on the function of half-site reactivity, 123
Noll, M., Stöffler, G. & Highland, J. H., Dissociation of *Escherichia coli* ribosomes into active subunits, 259
N-terminal region, function in ribosomal protein S4, 381
Nuclear DNA, vertebrate, fractionated, doublet frequency analysis, 1
Nucleotide and amino acid sequences of gene *G* of ϕX174, 519

Oligonucleotides used in selective initiation of transcription of bacteriophage ϕX174 *in vitro*, 753
Organization of eukaryotic genomes at a macromolecular level, 237

ϕX174 (see also Bacteriophage), 753, 771
—, nucleotide and amino acid sequences of gene *G*, 519
Packing of DNA in single crystals inferred from freeze–fracture–etch replicas, 271
—, molecular, of collagen: three-dimensional analysis of electrostatic interactions, 705
Pawl, G., Taylor, R., Minton, K. & Friedberg, E. C., Enzymes involved in thymine dimer excision in bacteriophage T4-infected *Escherichia coli*, 99
Petsko, G. A. (see also Martin, P. D.), 265
Phenylalanine tRNA, yeast, crystallographic refinement at 2·5 Å resolution, 619
Piez, K. A. (see also Trus, B. L.), 705
Plant leaf tissue, RNA synthesis: the characterization of mRNA species lacking and containing polyadenylic acid, 595
Plasmids, bacterial, involvement of multiple translocating DNA segments and recombinational hotspots in their structural evolution, 333
Plasmids, F-like, vegetative replication cannot be supported by mutant of *Escherichia coli*, 25
PM2 (see also Bacteriophage), 583
Polen, S. (see also Minkley, E. G., Jr), 111
Pollock, T. J. & Tessman, I., Units of functional stability in bacteriophage mRNA, 651
Polyadenylated and non-polyadenylated mRNAs, evidence of their association with protein; isolation of messenger ribonucleoproteins in cesium sulfate density gradients, 403
Polyadenylic acid, presence or absence in mRNA species; RNA synthesis in plant leaf tissue, 595
Polymerase for *Escherichia coli* RNA, localization of initiation sites; transcription of polyoma virus DNA *in vitro*, 83
Polymerization and catalytic activity of beef liver glutamate dehydrogenase, their functional relationship: experiment, 179
— — — — — — — — —, — — —: theory, 151
—, head to tail, of actin, 139
Polyoma virus DNA transcription *in vitro*; localization of *Escherichia coli* RNA polymerase initiation sites, 83
Polypeptides, stepwise elongation factor G-promoted elongation on the ribosome without GTP cleavage, 609
Pool size of free ribosomal proteins in rat liver cytoplasm, 201
Protein, capsid, major, and tumour antigen of Simian virus 40, synthesis in a cell-free system derived from *Escherichia coli*, 361
—, coat, non-functional, of a tobacco mosaic virus mutant: relationship to the virus assembly process, 789
—, evidence of polyadenylated and non-polyadenylated mRNA association; isolation of messenger ribonucleoproteins in cesium sulfate density gradients, 403
—, gene *32*, of bacteriophage T4, synthesis stimulated by ultraviolet irradiation, 67
— genes, ribosomal, and ribosomal RNA in *Escherichia coli*, effects of chloramphenicol on transcriptional activities, 535
Proteins L7/L12 of *Escherichia coli* 50 S subunit, close proximity to proteins L10 and L11, 781
Protein S4, ribosomal, function of the N-terminal region, 381
Proteins, ribosomal, free, determination of pool size in rat liver cytoplasm, 201

Quasi-elastic light-scattering data acquisition, reduction and error analysis, 197

Rabbit plasma transferrin, crystallization and preliminary X-ray investigation, 255
Rat liver cytoplasm, determination of the size of the pool of free ribosomal proteins, 201
Rate constants of formaldehyde reaction with nucleotides, 680

Recognition site mapping for the restriction endonuclease from *Escherichia coli* K12 on bacteriophage PM2 DNA, 583
Regulation, genetic, high resolution electron microscope studies, 471
Replication, chromosomal, in *Escherichia coli* K12, effect of thymine concentration, 295
— in main band and satellite DNAs of *Drosophila virilis*, electron microscopic analysis, 305
— initiation for DNA in *Bacillus subtilis*; analysis of molecular events involved in the initiation using a temperature-sensitive *dna* mutant, 683
— intermediates, short-chain, size distribution in HeLa cells, 55
— of colicin E1 plasmid DNA in cell extracts, and formation of catenated molecules, 569
— — different satellite DNAs in three species of *Dipodomys* (kangaroo rat), S phase patterns, 417
—, vegetative, of F-like plasmids cannot be supported by a mutant of *Escherichia coli*, 25
Restriction endonuclease from *Escherichia coli* K12, mapping of recognition sites on bacteriophage PM2 DNA, 583
— enzymes used in analysis of transcription of bacteriophage ϕX174 *in vitro*, 771
Revel, M. (see also Zilberstein, A.), 43
Ribonucleases A and S, new high pH crystal forms, 265
RNA, intracellular, species and genome of defective-interfering and standard Semliki Forest virus, sequence relationships, 491
—, messenger, bacteriophage, units of functional stability, 651
—, —, translation control by minor species of leucyl-tRNA in extracts from interferon-treated L cells, 43
— polymerase for *Escherichia coli*, localization of initiation sites; transcription of polyoma virus DNA *in vitro*, 83
—, ribosomal, and ribosomal protein genes in *Escherichia coli*, effects of chloramphenicol on transcriptional activities, 535
— synthesis in plant leaf tissue: the characterization of mRNA species lacking and containing polyadenylic acid, 595
—, transfer, of yeast phenylalanine, crystallographic refinement at 2·5 Å resolution, 619
RNAs, messenger, polyadenylated and non-polyadenylated, evidence that they are associated with protein; isolation of messenger ribonucleoproteins in cesium sulfate density gradients, 403
Ribonucleoproteins, messenger, isolation in cesium sulfate density gradients: evidence that polyadenylated and non-polyadenylated mRNAs are associated with protein, 403
Ribosomal DNA, amplified, heterogeneity of spacer lengths in circles for two insect species, *Dytiscus marginalis* and *Acheta domesticus*, 453
— proteins, free, determination of pool size in rat liver cytoplasm, 201
— protein S4, function of the N-terminal region, 381
— RNA and ribosomal protein genes in *Escherichia coli*, effects of chloramphenicol on transcriptional activities, 535
Ribosome, stepwise elongation factor G-promoted elongation of polypeptides on, without GTP cleavage, 609
Ribosomes of *Escherichia coli*, dissociation into active subunits, 259
